FUEL STORAGE

Up to 70% less costly than traditional solutions

50 years of experience allow PRONAL to guarantee **equipment suited for temporary or permanent storage of a variety of fuel** (from crude to jet fuel). The mastery of **hot vulcanization process under vacuum** brings to our worldwide partners a **high quality solution that does not alter the initial properties of the fuel**. It also contains **no weak points that could become the source of leaks** (no gluing or welding operations).

Recommended applications:

- Extension of fuel depots
- Set up of living quarters in remote areas
- Set up of airfield in rural areas
- Deployment of military troops

Main advantages:

- Very long service life
- Cost effective
- Reliable products
- Maintenance free

10m³ tank - 4m x 4m

200m³ tank - 18,5m x 9,80m

More than **50-years**
experience to serve
your projects

French company
worldwide recognized

ISO 9001 version 2008
certified

Network of more than
90 specialized
partners

Thousands tanks
installed over the world

Flexible tanks from
1 to 300 m³

Several
certifications

Integrating
global solutions

OIL STORAGE

Installation of a 300m³ tank within 2 hours

Manufactured from **high strength technical fabrics coated with elastomer on both sides**, PRONAL flexible tanks **are designed for oil storage**. Lightweight and quick to install, they provide a mean of **creating a storage solution of several hundred m³ in just a few hours**.

Examples of applications:

- Site maintenance operation
- Commissioning operation on transformers
- Rapid extension of storage depots
- Storage during recycling/treatment

Main advantages:

- Simple and quick to deploy
- Lightweight and removable
- Resistant to extreme climatic conditions
- Temporary or permanent storage

20m³ tank - 6,29m x 4,13m

2 x 60m³ tank - 8,88m x 6,97m

FLEXIBLE TRANSPORTATION TANKS

Some tanks in service for more than 20 years

With the hope to provide **our partners with constantly improved storage solutions increasingly tailored to their needs**, PRONAL has developed a range of flexible tanks suitable for transporting hydrocarbons by land, air and sea.

Examples of applications:

- Flexible tank on truck trailer
- Flexible tank fitting to 20 or 40 ft container
- Helicopter-transportable flexible tank
- Floating flexible tank

Main advantages:

- Economical
- Reliable
- Practical
- Be spoke

Helitank - 2 x 2500l

Floating tank - 6m³
